

3000mm (120") Modular Gantry Mill Kit

- **Linear rails with precision carriages**
- **Simultaneous twin ball screw feed**
- **Mount existing milling equipment**
- **Magnet mounting available**
- **Auto feed X and Y axis**
- **Compatible with Mirage MR1000, MR1500, MR2200 & MR3000 linear milling machines**

A linear rail kit to convert 2 axis milling machines to a large area 3 axis milling machine in situ. Used for heat exchangers, pump and motor pads, steel mill stands, ship building, turbine split lines and many more.

The machine is supplied complete with:

- Toolkit including air filter lubricator and hose connection (when required)
- All required bolts and connector shafts (Milling machine specific)
- Storage / shipping box
- CE certificate, packing list and Manual

Range

A	3300mm	130"
Stroke	3000mm	120"
B (Standard)	2200mm	86"
C	3300mm	130"

Dimension B is governed by the length of the Milling machine used with the Gantry Mill
